

THE CITY OF DREAMS

Vienna, Austria

A MUSICAL LEGACY

Vienna is the capital and largest city of Austria. Apart from being regarded as the City of Music because of its musical legacy, Vienna is also said to be «The City of Dreams» because it was home to the world's first psycho-analyst – Sigmund Freud.

The city is well known for having played an essential role as a leading European music centre, from the great age of Viennese Classicism through the early part of the 20th century.

The city's roots lie in early Celtic and Roman settlements that transformed into a Medieval and Baroque city, and then the capital of the Austro-Hungarian Empire.

The historic centre of Vienna is rich in architectural ensembles, including Baroque castles and gardens, and the late-19th-century Ringstraße lined with grand buildings, monuments and parks.

HOW TO GET THERE

The city of Vienna is accessible from all major airports. If you prefer private transportation, please contact Merima Bajramovic. merima.bajramovic@camlog.com

Hotel information

Hotel Regina,
Rooseveltplatz 15, 1090 Wien, Austria

THE COURSE IN VIENNA with Dr. Beschnidt & Dr. Dr. Seemann

Registration by Email MERIMA.BAJRAMOVIC@CAMLOG.COM

I am booking June 24 – 27, 2021 November 4 – 7, 2021

Title Mrs. Mr. Prof. Dr.
Specialization Periodontist General practitioner Prosthodontist Oral surgeon

Last name First name

Address/Street Zip code City Country

Please settle course fees latest one week prior to the course commencement.
Your registration is only valid and binding after receipt of payment by BioHorizons CAMLOG

THE COURSE

with Dr. Beschnidt & Dr. Dr. Seemann

Vienna, Austria

June 24 – 27, 2021 / November 4 – 7, 2021

In association with the Anatomical Institute of the Medical University of Vienna

General Terms of Business: 1. Registration has to be made in written form. A written confirmation letter will be sent in return. 2. Payment after receipt of invoice has to be conducted to following bank account in Euro, made payable to a Swiss bank. Name of Bank: UBS AG CH-8098 Zürich. Bank clearing-no.: 233. Account-no.: 233-773282.60P. Swift: UBSWCHZH80A. IBAN: CH54 0023 3233 7732 8260 P. 3. Payment is net due without any discount (free of charge for the receiver). 4. In case of cancellation by the part of the course participant later than 14 days before the beginning of the course, there will be no fee reimbursement. In case of no show at the course, the whole course fee will be due. 5. CAMLOG Biotechnologies AG reserves the right to cancel the course until 14 days before the beginning if the required number of participants is not reached or in case of hindrance of the speakers. In these cases, there is no claim for damage. 6. CAMLOG Biotechnologies AG reserves the right to alter course dates and contents.

OVERVIEW

Course Content

Category International Courses, Hands-on, Live-Surgery

Speakers Dr. Beschnidt & Prof. Dr. Dr. Seemann

Dates June 24 – 27, 2021
November 4 – 7, 2021

City Vienna/Austria

Target group Dentists and oral surgeons

Level Very advanced

Language English

Participants min. 12 max. 18

Event Group Dinner

INTRODUCTION

THE COURSE offers a new, comprehensive practice-orientated approach to surgical and anatomical learning for dentists and oral surgeons. The COURSE ensures participants receive a high-quality learning experience provided by recognised, international leaders in their field.

Our experienced lecturers Dr. Marcus Beschnidt and Dr. Dr. Rudolf Seemann will personally supervise the hands-on trainings, as well as share their personal tips and tricks based on their many years of clinical experience.

The curriculum covering four days is divided between theory and practice. Topics include understanding the differences between soft and hard tissue management, where course participants gain hands-on experience on microsurgical techniques and micro suturing.

Using fresh specimens, participants will focus on surgical techniques used for "Hard Tissue Management".

All operations are demonstrated by expert lecturers using a Zeiss Microscope via live feed on flat screen monitors.

AFTER COMPLETION

Participants will:

- know the parameters of gingival esthetics and morphologic bone changes around implants
- understand the principles of microsurgery for a systematic soft tissue healing
- understand the principles of bone healing and bone formation
- be able to use different incision and suturing techniques
- know different bone harvesting areas and techniques
- have used different bone harvesting instruments
- have practiced covering a graft using specific flap management requirements

COURSE PARTICIPANTS ARE EXPECTED TO HAVE

- knowledge of implantology
- a flair for microsurgery
- to bring their own magnification loupes >3.5X.

CURRICULUM

Four day schedule

DAY 1 Hotel, 09:00 – 18:00
THEORETICAL CONTENT Includes hands-on sessions

Soft Tissue Management (RS)

- General Introduction
- Anatomical and structural-biological backgrounds
- Parameters of gingival esthetics

The Main Principles of Surgery (MB)

- Principle of microsurgery
- Systematics of soft tissue healing

Hands-on practical techniques /MB)

- Incision techniques
- Flap management
- Suture techniques

Hard Tissue Management (RS)

- General Introduction
- Anatomical and structural-biological backgrounds

- Parameters of morphologic bony changes around implants (3D bone responses)

The Main Principles of Surgery (MB)

- Principle of grafting vs. substituting bone
- Systematics of bone healing and bone formation

Hands-on Practical Techniques (MB)

- Bone harvesting techniques and instruments usage
- Bone harvesting areas
- Management of bone vs. bone substitutes
- Graft-covering techniques

7.30 pm dinner and evening event

DAY 2 Anatomical Institute, 09:00 – 17:30
HANDS-ON PRACTICE Surgery using fresh specimens

Soft Tissue Management (MB)

- The essentials
- Anatomical oriented multilayer flaps
- Harvesting techniques of free and pedicle grafts

The Surgical Procedure (MB/RS)

- ARF (apical repositioned flaps) Vestibuloplasty (Mucograft®)
- Immediate implant with EAT (Early Abutment Technique) with CTG
- Socket fill (preservation) (Mucograft® vs. CTG)
- Recession coverage techniques RS | MB (envelope, tunnel, double papilla flap)

The Anatomy

- Buccal fat pad

DAY 3 Anatomical Institute, 09:00 – 17:30
HARD TISSUE MANAGEMENT Fresh specimens

The essentials (RS)

- Access to bony donor sites
- Bone harvesting techniques
- MCBB – Mand. angle, tuberosity, chin, tabula ext.
- Bone chips (bone mill, scratchers, drills)

The surgical techniques

- GBR (Bio-Oss®, Bio-Gide® sliced technique, pins) – Poncho flap
- Onlay graft (J-graft) Bone Ring with Impl., MCBB (bonescrew, membrane) – Multi layer flap
- Bone shell-technique (bonescrew) in combination with Bio-Oss®
- Bone splitting
- Sinus lift (intern/extern)

The Anatomy on Half Head (RS)

- N. alveolaris inf. + N. mentalis
- N. lingualis
- A. palatina
- and other structures

DAY 4 Hotel, 09:00 – 14:00
THEORETICAL CONTENT

Soft tissue management

- Adjunct safety considerations (MB)
- Identification of patients at risk
- Pre- and postoperative patient management

Hard tissue management

- Adjunct safety considerations
- Identification of patients at risk (bisphosphonates, radiated patients, osteoporosis)
- Pre- and postoperative patient management
